- **Avoid unnecessary delays to trains at fixed signals. This is best achieved by placing signals at proceed, subject to safe working regulations, in ample time to obviate any risk of checks or blocks. Also ensure that signals are showing a clear indication.**
- **Stow brakevans correctly and prepare consignments en route for prompt discharge at roadside stations.**
- **Avoid delays by efficient team work in loading and unloading brakevans. When it will obviate delay, discharge consignments on to the platform instead of sorting the articles on to trollies.**
- **During periods of heavy traffic advise stations in advance where accommodation is available on trains. This is an important service to the public apart from minimising delays.**
- **When the length of the train is such that double stops might be incurred, direct roadside passengers to carriages toward the rear of the train; trainmen to be appropriately instructed.**
- **Always provide the most suitable carriage stock available, cleaned and fully serviced.**

GENERAL NOTES.

A copy of every new issue of the **WORKING TIME-TABLE BOOK**, or section of the Book, is to be supplied to all concerned in accordance with Regulation 8.

It is imperative that each Stationmaster carefully check this Time-table, regarding the timing of trains, crossing arrangements, etc., so far as his own station or the stations he supervises are concerned. He will be held responsible for promptly bringing under the notice of the Time-tables Co-ordinator (Room G28) and Manager, Suburban Stations or Manager, Country Train Operations (Eastern) any inaccuracies that may appear herein.

WALL SHEET TIME-TABLES issued in conjunction with this book are to be posted in a prominent position at a height from the ground and in close proximity to a light to enable passengers to consult it with facility. A red Line must be ruled on each time-table under the name of the station concerned and time applying to it.

PASSENGER, RAIL MOTOR AND MIXED TRAIN RUNNING.—Depot stations must obtain full particulars from Guards of the late running of Passenger, Rail Motor and Mixed trains. In the case of a Rail Motor run without a Guard, the necessary particulars shall be obtained from the Driver. In the event of any time being lost by the locomotive, the cause, also locomotive number and class, must be ascertained from the Driver, and the Train Controller advised. Drivers will require to explain the cause of any time lost that in the aggregate exceeds the time gained on the journey.

When a Passenger, Rail Motor or Mixed train is blocked at a roadside station, the Train Controller must be advised by the Stationmaster at the station at which the block occurred and if the train which caused the block was running late, the cause of such late running (whether overtime in section or other cause) must be given if ascertainable.

SUBURBAN PASSENGERS NOT TO TRAVEL BY COUNTRY TRAINS.

"DOWN": Victorian Country trains from Melbourne including Rail Motor as well as Locomotive hauled Passenger Trains shown in the Working Time-table books are not available for inter-station passenger travel within the electrified suburban area unless otherwise specified in the Time-table books referred to.

"UP": Victorian Country trains to Melbourne, including Rail Motors as well as Locomotive hauled Passenger Trains shown in the Working Time-table Books **ARE AVAILABLE** for inter-station suburban passenger travel within the electrified suburban area.

Suburban passengers within the area stipulated above may entrain and/or detrain at suburban stations where a country train is scheduled to stop including travel through to Spencer Street or Flinders Street stations as the case may be.

Most Country trains terminating at Spencer Street will do so at the Country Terminal, whilst certain services will terminate or be routed via the suburban platforms. Suburban passengers travelling by country services to Spencer Street are to be advised where practicable, as to whether the train will terminate at the Country Terminal or Suburban platform.

One class suburban ticket holders are not permitted to travel in first class carriages.

GENERAL INSTRUCTIONS.

METHOD OF NUMBERING TRAIN TIME-TABLES, ETC.

Down trains are given odd and Up trains even numbers (Suburban Lines excepted).

The lines above the departure time figures at side indicate the station appointed for trains to meet or pass each other, also the numbers of the trains to be so met or passed

For example, on pages 44 and 55 appear the following :—

	DOWN		UP		
		8445 PASS. MON. TUE., WED., THUR.			9472 Goods MON. TO FRI.
		p.m. 6 52 —9416			p.m. 5 3
Leongatha	arr.		Koo-wee-rup	arr.	
"	dep.	6 56	"	dep.	6 25

8445, 8447, 8460

The above example indicates :—

- (a) That **No. 8445** (Down) meets **No. 9416** (Up)
- (b) That **No. 9472** (Up) meets **No. 8445** (Down) or **No. 8447** (Down) & follows **No. 8460** (Up)

Footnote references are indicated by Capital letters A, B, C, etc., shown after the figures in Train Schedules such as **3.37A** shown for number **8443** (Down) train at Flinders Street (Page 4).

LOADS OF GOODS TRAINS

Schedule Loads.—The schedule loads laid down for Goods trains, on Broad-gauge lines, may be exceeded by six (6) tonnes when, by so doing, an extra vehicle can be despatched by a train which would otherwise be under the schedule load.

Double-Headed Loads.—The load which may be hauled by two locomotives is the combined load of the locomotives employed.

The general conditions governing locomotives assisting in front of trains and the lines on which double heading is permitted are shown on page 124.

Parcels Coaches and Motor Coaches.—(i) When Parcels Coaches and Motor Coaches, except Nos. 113 "M" and 156 "M" are used for hauling Goods, Stock, or Horse-boxes, the number of vehicles hauled must not exceed eight (8) including brakevan. The vehicle limit for 113 "M" and 156 "M" is governed by the mass set out in clause (ii).

(ii) The maximum load for all Parcels Coaches and Motor Coaches (except as set out in clause (iii)) must not exceed the following :—

Ruling Grade	Trailing Load	Ruling Grade	Trailing Load
Level	.. 410 tonnes	1 in 50	.. 125 tonnes
1 in 200	.. 285 "	.. 1 in 40	100 "
1 in 100	.. 215 "	1 in 30	.. 70 "

(iii) When Motor Coaches Nos. 113 "M" or 156 "M", are used for shunting purposes in Jolimont Yards a maximum trailing load of 560 tonnes may be hauled.

Diesel Fordson Tractors.—Maximum load hauling or propelling on level is 230 tonnes. The maximum load on grades at a speed of 5 miles per hour (10 km/h) are as follows :—Grade 1 in 50, 30 tonnes; 1 in 75, 65 tonnes; 1 in 100, 85 tonnes; 1 in 110, 90 tonnes; 1 in 200, 150 tonnes. See page 124 for maximum permissible speed.

GENERAL INSTRUCTIONS—continued

LOCOMOTIVE RUNNING SCHEDULES

The following instructions are applicable to the loads and Locomotive Running Schedules published in the Working Time-table :—

(a) **Goods Trains**—The schedules for Goods trains represent the time necessary to run each section with the specified load under average conditions.

(b) **Through Goods Trains**—

The Locomotive Running schedules for Through Goods trains are based on the Loads which a locomotive can haul over the Ruling Grade between recognised Terminal Stations and provide for these trains stopping at certain stations, viz. :—

Recognised Terminal Stations.

Stations where Locomotive Power is changed.
Stations where trains have to stop to test Brakes.

Should the train stop at any other station *en route*, an allowance of two (2) minutes over and above the Through schedule is to be allowed at each such station where train stops.

The Running Schedules for Through Goods trains, except where schedules applicable to special loads are provided, are based on the Ruling Grade Loads between the recognised Terminal Stations shown hereunder :—

105	Bairnsdale to Sale	111	Korumburra to Yarram
105	Sale to Traralgon	112	Yarram to Korumburra

(c) **Roadside Goods Trains**—The Locomotive Running Schedules for Roadside Goods Trains are based on the Sectional Loads and proportions of those Loads, and provide for train stopping at all stations.

Light Locomotives.—(i) The Running schedule for a "Light" Locomotive, two "Light" Locomotives attached, or in either case with only a brakevan attached, shall (subject to the instructions on pages 114 to 124) be equal to the schedule for the fastest stopping Passenger train, for the section over which the locomotive runs, unless a special schedule is issued to the contrary.

See page 122 for speed of light locomotives.

(ii) In every case where a brakevan is attached to the locomotive or locomotives, the train must be signalled as a "through" Goods Train; but before sending the "Is Line Clear" Signal, each Signalman must inform the Signalman in advance, by telephone that the train consists of a Locomotive (or Locomotives) and brakevan.

<p>It will be the duty of the Engineman to maintain the speed of his train as near to the maximum permissible speed as the load and grade will allow.</p>

SPEED OF LOCOMOTIVES OR TRAINS, CLASSES OF LOCOMOTIVES ALLOWED TO RUN ON VARIOUS LINES & LOCOMOTIVE AXLE LOADS

SPEED OF LOCOMOTIVES OR TRAINS

1. The **maximum** speed is the **highest speed allowed** on any portion of the line.
2. **Speed of Trains.**—It must be clearly understood by Enginemen, Rail Motor Drivers and Guards that the maximum permissible speed authorised for the line and for the type of train must not, under any circumstances, be exceeded over any portion of the journey. In any instance where the times shown in the Working Time-table to run any section conflict with the maximum permissible speed authorised for that particular section, or with any safe working or other instruction, the Time-table times are not to be adhered to, and the matter is to be promptly reported to the Time-tables Co-ordinator and Manager Suburban Train Operations or Manager Country Train Operations (Eastern) by Stationmaster and others engaged in Train Running. Enginemen to bring the matter under notice of any Superior Officer, who must report the matter to his Manager, and, in addition forward copy of his report direct to the Time-tables Co-ordinator.
3. The maximum speeds laid down in respect of the various Lines, or portions of Lines, are subject to:—
 - (i) the provisions of Regulation 59;
 - (ii) the special speeds shown on pages 120 to 124 inclusive;
 - (iii) such **temporary** speed reductions as are shown from time to time in the Weekly Notice or other printed or written instructions; and
 - (iv) the special speeds laid down in clause 8 hereunder, and clause 9, page 115.

SPEED OF LOCOMOTIVES OR TRAINS—continued

4. (i) Passenger trains consisting of the following may run at the speeds laid down for Passenger trains:
- (a) Passenger Carriages (except Suburban 'M' (Tait) or 'CM' vehicles).
 - (b) Passenger Brakevans and Powervans
 - (c) Victorian bogie goods vehicles having 'P' as the last or second last letter of their classification.
- (d) Intersystem vehicles permitted to run at Passenger train speeds (See Working Time Table Addenda, pages 65 to 106)
 Passenger trains conveying other vehicles must not exceed the maximum permissible speed for those vehicles, and must be specially authorised by the Chief Operations Manager
- (ii) Express Goods or Mixed trains consisting of the following may run at the speeds laid down for Express Goods trains:
- (a) Victorian bogie goods vehicles.
 - (i) having 'F', 'P', 'X' or 'Y' as the last letter of their classification except loaded Tank Wagons having 'F', 'X' or 'Y' as the last letter of their classification.
 - (ii) having three or four letter classification 'W' being the last letter.
 - (iii) Empty TankWagons having 'F', 'X' or 'Y' as the last letter of their classification.
 - (b) Passenger Carriages (except Suburban 'M' (Tait) or 'CM' vehicles)
 - (c) Passenger Brakevans and Powervans
 - (d) Intersystem vehicles permitted to run at or above Express Goods train speeds (See Working Time Table Addenda, pages 65 to 106).
 Express Goods or Mixed trains conveying other vehicles must not exceed the permissible speed for those vehicles.
 - (iii) Trains conveying any vehicle not included in (ii) above, may run at the speeds laid down for Goods trains (except loaded 'VHWA' Wagons).
 - (iv) The maximum speed for Suburban 'M' (Tait) and 'CM' vehicles, loaded Petroleum Tank Wagons and loaded 'VHWA' Wagons is laid down in Special Speeds, page 122 clause 4.
 - (v) It will be the duty of the Guard to inform the Engineman at the commencing point of the train of the Maximum Speed allowed due to the classes of vehicles included in the train and the Engineman or Guard, if relieved, must pass this information on to his relief.

5. Enginemen, Assistant Enginemen, and Guards must keep a good look-out for hand signals, which will be exhibited at the various localities where temporary speed reductions are in force in accordance with the Regulations. It must, however, be understood that repairs to lines may be necessary at other places besides those mentioned in the Weekly Notice or other printed or written instructions, and of which, owing to their urgency, it has not been possible to give previous notice. Enginemen must, therefore, be always on the look-out, and be prepared to stop or run at reduced speed whenever and wherever hand signals are exhibited. (See General Appendix respecting Special Permanent Way Signals)

6. Stationmasters, Signalmen, Guards, Gangers, and others must promptly report through their Superior Officers any case in which a train runs in excess of the speed laid down, and such report must be forwarded to the Head of the Branch without delay.

7. Maximum Speed for Trains Hauled by Certain Classes of Locomotives.—The maximum speed permissible on any Line for various classes of Locomotives with train attached, are shown hereunder:—

Class	M.P.H.	Km/h	Class	M.P.H.	Km/h	Class	M.P.H.	Km/h	Class	M.P.H.	Km/h

Note 1.—The maximum speeds laid down for Locomotives in clause 7 hereof are subject to the maximum speeds laid down in respect of various lines, or portions of lines, and to the conditions imposed above and also on pages 115 and 124 inclusive.

Note 2.—See page 122 for speed of a locomotive or locomotives with a brakevan of fixed-wheel base only attached, and for speed of light locomotives.

Note 3.—The maximum speed for trains hauled by "S" class Electric Diesel Locomotives when Hostler's End leading is 30 M.P.H. (50 km/h) and when Hostler's End leading in Station Yards 10 M.P.H. (15 km/h) Setback movements, when driven from Hostler's End, are not permitted.

Note 4.—The maximum speed for trains hauled by 'X' class Diesel Electric Locomotives No's. 45 onwards and 'C' class locomotives when running long end leading must not exceed 30 M.P.H. (50 km/h)

SPECIAL SPEEDS

The maximum Speeds laid down in clauses 1, 2, 3 and 4 hereof are subject to the maximum Speeds laid down in respect of the various Lines or portions of Lines and to—

- (i) the provision of Regulation 59 ;
- (ii) such temporary speed reductions as are shown from time to time in the "Weekly Notice" or other printed or written instructions ; and
- (iii) the special Speeds laid down in clause 8, page 114, and clause 9, page 115.

1. **Curves.**—(a) Every curve, with the exception of those referred to in clause 2 hereof, that is of such a radius as to render necessary any modification of the foregoing speeds is indicated by a **curve board** (see diagram in margin) placed on the left-hand side of the line at the entrance to the curve. The number shown on the Curve Board indicates in miles per hour, the maximum speed allowed when going round the curve. It is pointed at one end, and is so placed that the pointed end indicates the direction of the curve, right-hand, or left-hand, as the case may be. The speed must be reduced before the Locomotive or train enters on curve, and the indicated speed must not be exceeded until the whole train is clear of the curve.

2. **Passing Over Points.**—The following Speed Restrictions apply generally when passing over points at stations, junctions and sidings :—

	Maximum Speed			
	When Running to or from Lines Diverging from the Straight Track		When Running on the Straight Track

LIGHTING OF COUNTRY TRAINS

These arrangements are based on the scheduled times of trains and average weather conditions. In the event of late running, exceptionally dull weather, or trains being docked near verandahs, etc., Stationmasters, Guards and Conductors must vary arrangements as circumstances require. When non-vestibuled carriages are in use on the Main Line trains, it may become necessary to depart from the following instructions, and in such instances, Stationmasters, Guards and Conductors will require to suitably arrange for the lighting of such carriages at a convenient station.

Economy must also be exercised in the use of electric lights in carriages, as serious damage, very costly to repair, occurs when the batteries become exhausted through the lights being allowed to burn unnecessarily at stations. A three-position switch is provided, viz. : "Off," "Half," and "Full Light."

See General Appendix, page 149, for instructions regarding electrically-lighted carriages and Brakevans.

(a) LIGHTING OF TRAINS WHEN PASSING THROUGH TUNNELS.

On trains which have to pass through tunnels and on which a Conductor is not employed, the carriages must be illuminated, but as considerable delay would be involved in lighting and extinguishing the lights at stopping stations on either side of the tunnels, arrangements are to be made for them to run with lights reduced, i.e., on half-lights.

DIESEL RAIL CAR AND DIESEL ELECTRIC RAIL MOTOR SERVICES

Guard or Rail Motor Driver to switch on lights when necessary and extinguish them when no longer required.

TRAIN TIME-TABLE REFERENCE SYMBOLS

Express, Passenger, Rail Motor and Mixed trains must stop at stations where so scheduled in the Time-tables. Where the times of arrival and departure of trains are not both stated, the times shown are of those of departure from stations.

Where the time for the train is shown without the addition of one of the undermentioned symbols or other special reference, a definite stop must be made.

Where the following standard symbols, viz., *, †, §, ¶, ††, and Z are utilized with or without, as the case may be, a time being shown, they indicate how the train shall be dealt with at the particular station or stations, i.e., whether non-stop, or to stop in certain circumstances.

The symbols referred to and their application to the time-tables are as follows :—

‡ Indicates that the trains shall only require to stop at the station concerned in the following circumstances.

- (1) When signalled from the station to stop, indicating that there are passengers to be entrained.
- (2) And/or when the train is conveying passengers for the station. The Guard is responsible for informing the Driver that there are passengers to be detrained. If no conductor on the train, the Guard must make the necessary inquiries among the passengers at the previous stopping station. If no Guard be employed on a rail motor, the Driver must make the necessary inquiries.

* Trains will not stop to pick up or set down passengers at stations where the train schedule is marked thus *, or where this symbol occurs without an accompanying time.

§ Indicates that the train shall only require to stop at the station concerned in the following circumstances.

- (1) When signalled from the station to stop, indicating that there are passengers, vangoods and/or mails to be entrained.
- (2) And/or when the train is conveying passengers, vangoods or mails for the station. The Guard is responsible for informing the Driver that there are passengers, vangoods, or mails to be discharged. If no conductor on train, the Guard must make the necessary inquiries among the passengers at the previous stopping station. If no Guard be employed on a Rail Motor, the Driver must make the necessary inquiries.

¶ Indicates that the train will only stop if required to pick up passengers, vangoods and/or mails. Necessary signal to be exhibited when the trains are required to stop.

†† Trains to stop to set down, if required, but not to pick up passengers at stations where the train time-table is marked thus ††. Passengers desiring to alight must give notice to the Conductor at the previous stopping station, where Conductors must also inquire. On trains which have no Conductors, the Guard will be responsible for this duty. If no Guard be employed on a Rail Motor, the Driver must make the necessary inquiries. The Guard is responsible for informing the Driver that there are passengers to be detrained.

Z. Indicates that the train will stop at the Rail Motor Stopping Place concerned, for passengers only, in the following circumstances :—

- (1) When signalled from the Stopping Place to stop, indicating that passengers are to be entrained.
- (2) And/or when the train is conveying passengers for the Stopping Place. The Guard is responsible for informing the Driver that there are passengers to be detrained. If the train is a Rail Motor, and no Guard is employed, the Rail Motor Driver must make the necessary inquiries among the Passengers.

‡ Trains marked ‡ run only if required. Special advice will be issued by the Chief Operations Manager, Chief Train Controller, District Senior Train Controller or Depot Stations when the running of such trains is necessary.
