

VICTORIAN RAILWAYS

WORKING TIME-TABLE

EASTERN DISTRICT

On and after 31st October, 1982

(NOT TO BE ISSUED TO THE PUBLIC)

Suggestions or proposed alterations for next issue are to be forwarded to
the Chief Operations Manager (Room G.28M, Phone 1092)

GENERAL INSTRUCTIONS

BLOCK NOTES

EASTERN LINES

Three-position signalling is in force on the Up and Down Through Suburban between Spencer Street No. 2 Box and Flinders Street "A" Box; and on the Up and Down lines from Flinders Street "B", "C", "D" and "E" Boxes to Bunyip and between Yarragon and Moe.

Except as shown hereunder, the **Double Line Block Telegraph System** is in force on the Up and Down lines on the following sections:—Longwarry and Drouin; Drouin and Warragul; Warragul and Darnum; Darnum and Yarragon.

The **Automatic and Track Control System of Train Signalling** (General Appendix pages 163-174) is in force between Moe and Morwell. Herne's Oak is an Unattended Crossing Station at which the points and signals are remotely controlled from Morwell.

Lever Locking Track Control System (modified) is in force between:

Flinders Street 'A' Box and Spencer Street No. 2 Box (City Circle Viaduct)

Flinders Street 'A' Box and Spencer Street No. 2 Box (Burnley Loop Viaduct)

Flinders Street 'A' Box and Spencer Street No. 2 Box (Northern Loop Viaduct)

Flinders Street 'A' Box and Spencer Street No. 2 Box (Caulfield Loop Viaduct.)

Malvern is switched in as required for the operation of Local Goods Trains.

Oakleigh is switched in from 04 30 Mondays until 20 00 the following Saturday and at other times as arranged by the Train Controller.

General Motors is switched in from 06 30 to 21 00 Mondays to Fridays and at other times as arranged by the Train Controller.

Narre Warren is switched in as arranged by the Train Controller.

Berwick is switched in from 04 40 until 20 25 Mondays to Fridays. From 05 40 until 11 55 Saturdays. Sundays as arranged by the Train Controller.

Nar-Nar-Goon is switched in from 06 05 until No. 8474 clears and at other times as arranged by the Train Controller.

Drouin is switched in as a Block Post Mondays to Fridays from 05 50 until No. 8474/75 clears; Saturdays from 05 50 until No. 8456/57 clears, and at other times as arranged by the Train Controller.

Darnum is switched in as a Block Post Mondays to Fridays as arranged by the Train Controller.

Trafalgar is switched in Mondays to Saturdays as arranged by the Train Controller for the operation of Roadside Goods Trains.

Maryvale is provided with an Intermediate Electric Staff Instrument and worked in accordance with instructions shown in the General Appendix, pages 210-212.

Tinamba may be switched in as Electric Staff Station as arranged by the Train Controller Spencer Street who before doing so must arrange for the Engineman and Guard of each up and down train to be advised. The Signalman at the Staff station where the crews are instructed must make an entry to that effect across the figure line of the Train Register Book.

Bumberrah and **Waygara** are opened as Special Block posts as required in accordance with instructions contained in the General Appendix.

Lindenow may be opened as an Intermediate Block Post in accordance with instructions contained in the General Appendix.

NOTE:—Regular use of the Staff Automatic Exchange Apparatus at Bunyip and Longwarry ceased during December 1979.

SOUTH EASTERN LINES

Lang Lang is switched in as an Electric Staff Station as arranged by the Train Controller.

When required **Lyndhurst**, **Fish Creek** and **Buffalo** may be opened as Intermediate Block Posts in accordance with instructions contained in the General Appendix, pages 204-207.

When required **Alberton** may be opened as an Intermediate Block post in accordance with instructions contained in the General Appendix, pages 157 and 158.

BOGIE LOUVRE VANS AND FREIGHT VEHICLE WORKING BY INTERURBAN AND INTERCITY PASSENGER TRAINS

Bogie louvre vans and freight vehicles are regularly worked by the following Eastern District passenger trains:

08 26 (No. 8406/07) Pass. Spencer Street-Bairnsdale Mondays to Saturdays. "VBPY" (loaded Sale and Bairnsdale) marshalled leading ex Spencer Street.

18 26 (No. 8430/8431) Pass. Spencer Street-Sale, Mondays to Thursdays. "VBPY" (loaded Bairnsdale and beyond parcels) marshalled leading ex Spencer Street.

18 26 (No. 8432/8433) Pass. Spencer Street-Bairnsdale, Fridays. "VBPY" (loaded Bairnsdale and beyond parcels) marshalled leading ex Spencer Street. For detachment at Bairnsdale, return per 1600 (No. 9474 goods to Traralgon Monday, thence per 1700 (No. 8474/75) Traralgon - Spencer Street, Pass. Tuesday.

21 15 (No. 8474/75) Pass. Spencer Street-Traralgon, Mondays to Thursdays. "VPBY" (loaded parcels Bairnsdale and beyond) marshalled leading ex Spencer Street for detachment at Traralgon for transfer to No. 9453 Goods, Traralgon-Bairnsdale. Return per 1600 (No. 9474) Goods, Bairnsdale to Traralgon Tuesday to Friday, thence per 1700 (No. 8474/75) Traralgon-Spencer Street Pass. Monday, Wednesday to Friday.

21 15 (No. 8474/75) Pass. Spencer Street-Traralgon, Friday. "VPBY" (loaded parcels Bairnsdale and beyond) marshalled leading ex Spencer Street. Detached at Traralgon and returned per 0600 (No. 8452/53) Pass. Bairnsdale-Spencer Street Saturdays, marshalled leading ex Traralgon.

06 00 (No. 8452/53) Pass. Bairnsdale to Spencer Street Saturdays. "VPBY" is attached leading ex Traralgon for return of BRUTE trollies.

07 00 (No. 8450/51) Pass. Sale-Spencer Street, Tuesdays to Fridays. "VBPY" (loaded parcels and return of BRUTE trollies) marshalled trailing ex Sale.

13 20 (No. 8468/69) Pass. Bairnsdale - Spencer Street, Mondays to Saturdays. "VBPY" (loaded Parcels and return of BRUTE trollies) marshalled leading ex Bairnsdale.

17 00 (No. 8474/75) Pass. Traralgon - Spencer Street, Mondays to Fridays. "VBPY" (loaded parcels and return of BRUTE trollies) marshalled trailing ex Traralgon.

Other "VBPY" wagons returned to Flinders Street as arranged by Manager Passenger Services.

MAKE UP OF PASSENGER TRAINS

The composition of InterUrban and InterCity passenger trains are as published by the Manager Passenger Services, Carriage Allotment Officer, extension 1673.

* Locomotive Running Schedule based on train being non-stop at these stations.

(Reserved)

GENERAL INSTRUCTIONS.

METHOD OF NUMBERING TRAIN TIME-TABLES, ETC.

Down trains are given odd and Up trains even numbers.

The lines above the departure time figure at side indicate the station appointed for trains to meet or pass each other, also the number of the trains to be so met or passed

For example:-

DOWN		(a) 9429 Goods MON. TO FRI.	UP		(b) 9478 Goods MON. TO FRI.
Morwell	arr.	17 03	Moe	arr.	23 08
"	dep.	-8474,9423 17 32'	"	dep.	-8437 23 30

The above example indicates:-

- (a) That No. 9429 (Down) meets No. 8474 (Up) and follows No. 9423 (Down).
- (b) That No. 9478 (Up) meets No. 8437 (Down).

LOADS OF GOODS TRAINS

Schedule Loads:-The schedule loads laid down for Goods trains, on both Broad and Standard Gauge lines may be exceeded by the following authorised overloads:-

SINGLE LOCOMOTIVES

When hauled by a "B", "C", "L", "S" or "X" Class Locomotive

- 25 tonnes.

When hauled by a "H", "T" or "Y" Class Locomotive

- 15 tonnes.

MULTIPLE LOCOMOTIVES

A train being hauled by locomotives working in multiple is authorised to have an overload equivalent to the total of that permitted to be taken by each of such locomotives.

EXAMPLES:

(A) Train hauled by "T" + "T" locomotives in multiple
- Permitted overload

- 30 tonnes

(B) Train hauled by "B" + "T" locomotives in multiple
- Permitted overload

- 40 tonnes

(C) Train hauled by "X" + "B" locomotives in multiple
- Permitted overload

- 50 tonnes

Double Headed Loads.-The load which may be hauled by two locomotives is the combined load of the locomotives employed.

The general conditions governing locomotives assisting in front of trains and the lines on which double heading is permitted are shown on page 63.

Parcels Coaches and Motor Coaches.-(i) When Parcels Coaches and Motor Coaches are used for hauling Goods or Stock, the number of vehicles hauled must not exceed eight (8) including brakevan.

(ii) The maximum load for all Parcels Coaches and Motor Coaches must not exceed the following:-

Ruling Grade	Trailing Load	Ruling Grade	Trailing Load
Level	410 tonnes	1 in 50	125 tonnes
1 in 200	285 "	1 in 40	100 "
1 in 100	215 "	1 in 30	70 "

Diesel Fordson Tractors.-Maximum load hauling or propelling on level is 230 tonnes. The maximum load on grades at a speed of 10 km/h are as follows:-Grade 1 in 50, 30 tonnes; 1 in 75, 65 tonnes; 1 in 100, 85 tonnes; 1 in 110, 90 tonnes; 1 in 200, 150 tonnes, See page 62 for maximum permissible speed.

LOCOMOTIVE RUNNING SCHEDULES

(a) **Goods Trains**—The schedules for Goods trains represent the time necessary to run each section with the specified load under average conditions.

The Locomotive Running schedules for Through Goods trains are based on the loads which a locomotive can haul over the Ruling Grade between recognised Terminal Stations and provide for these trains stopping at certain stations, viz.:-
Recognised Terminal Stations. Stations where Locomotive Power is changed.
Stations where trains have to stop to test brakes.

The Running Schedules for Through Goods trains, except where schedules applicable to special loads are provided, are based on the Ruling Grade Loads between the recognised Terminal Stations shown hereunder:-

(c) **Roadside Goods Trains**—The Locomotive Running Schedules for Roadside Goods Trains are based on the Sectional Loads and proportions of those Loads, and provide for trains stopping at all stations.

See page 60 for speeds for light locomotives.

(ii) In every case where a brakevan is attached to the locomotive or locomotives, the train must be signalled as a "through" goods train; but before sending the "Is Line Clear" Signal, each Signaller must inform the Signaller in advance, by telephone that the train consists of a locomotive (or locomotives) and brakevan.

It will be the duty of the Engineman to maintain the speed of his train as near to the maximum permissible speed as the load and grade will allow.

GENERAL REFERENCES TO FOOTNOTES OF LOAD SCHEDULES

(Pages 45 to 54)

(d) Reference to General Appendix.

(f) Special vehicle limitations.

(x) Load for trains not requiring to stop certain stations.

LOCOMOTIVE OR TRAIN SPEEDS AND CLASSES ALLOWED TO RUN ON VARIOUS LINES.

LOCOMOTIVE OR TRAIN SPEEDS

1. The maximum speed is the highest speed allowed on any portion of the line.
2. **Speed of Trains.**—It must be clearly understood by Enginemen and Guards that the maximum permissible speed authorised for the line and for the type of train must not, under any circumstances, be exceeded over any portion of the journey. In any instance where the times shown in the Working Time-table to run any section conflict with the maximum permissible speed authorised for that particular section, or with any safe working or other instruction, the Time-table times are not to be adhered to, and the matter is to be promptly reported to the Time-tables Co-ordinator, Manager Suburban Train Operations or Manager Country Train Operations (Eastern) by Stationmasters and others engaged in Train Running. Enginemen to bring the matter under notice of any Superior Officer, who must report the matter to his Manager, and, in addition forward copy of his report direct to the Time-tables Co-ordinator.
3. The maximum speeds laid down in respect of the various lines, or portions of lines, are subject to:—
 - (i) the provisions of Regulation 59;
 - (ii) the special speeds shown on pages 58 to 62 inclusive;
 - (iii) such temporary speed reductions as are shown from time to time in the Weekly Notice or other printed or written instructions; and
 - (iv) the special speeds laid down in clause 7 hereunder, and clause 8, page 54.
4. Passenger trains consisting of the following may run at the speeds laid down for Passenger trains:
 - (a) Passenger Carriages (except Suburban 'M' (Tait) or 'CM' vehicles).
 - (b) Passenger Brakevans and Powervans.
 - (c) Victorian bogie goods vehicles having 'P' as the second last letter of their classification.
 - (d) Intersystem vehicles permitted to run at passenger train speeds (See Working Time Table Addenda).
 Passenger trains conveying other vehicles must not exceed the maximum permissible speed for those vehicles, and must be specially authorised by the Chief Operations Manager.
- (i) Express Goods trains consisting of the following may run at the speeds laid down for Express Goods trains:
 - (a) Victorian bogie goods vehicles.
 - (i) having 'W', 'X' or 'Y' as the last letter of their classification except loaded Tank Wagons having 'X' or 'Y' as the last letter of their classification.
 - (ii) Empty Tank Wagons having 'X' or 'Y' as the last letter of their classification.
 - (b) Passenger Carriages (except Suburban 'M' (Tait) or 'CM' vehicles).
 - (c) Passenger Brakevans and Powervans.
 - (d) Intersystem vehicles permitted to run at or above Express Goods train speeds (See Working Time Table Addenda).
 Express Goods trains conveying other vehicles must not exceed the permissible speed for those vehicles.
- (ii) Trains conveying any vehicle not included in (i) above, may run at the speeds laid down for goods trains (except loaded 'VHWA' wagons).
- (iii) The maximum speed for Suburban 'M' (Tait) and 'CM' vehicles, loaded Petroleum Tank Wagons and loaded 'VHWA' Wagons is laid down in Special Speeds, page 60 clause 4.
- (iv) It will be the duty of the Guard to inform the Engineman at the commencing point of the train of the Maximum Speed allowed due to the classes of vehicles included in the train and the Engineman or Guard, if relieved, must pass this information on to his relief.
5. Enginemen, Assistant Enginemen, and Guards must keep a good look-out for hand signals, which will be exhibited at the various localities where temporary speed reductions are in force in accordance with the regulations. It must, however, be understood that repairs to lines may be necessary at other places besides those mentioned in the Weekly Notice or other printed or written instructions, and of which, owing to their urgency, it has not been possible to give previous notice. Enginemen must, therefore, be always on the lookout, and be prepared to stop or run at reduced speed whenever and wherever hand signals are exhibited. (See General Appendix respecting Special Permanent Way Signals).
6. **Stationmasters, Signalmen, Guards, Gangers, and others must promptly report through their Superior Officers any case in which a train runs in excess of the speed laid down, and such report must be forwarded to the Head of the Branch without delay.**
7. **Maximum Speed for Trains Hauled by Certain Classes of Locomotives.**—The maximum speed permissible on any line for various classes of locomotives with train attached, are shown hereunder:—

Class	Km/h	Class	Km/h	Class	Km/h	Class	Km/h
B (Diesel-Electric)	115	E Electric 1102-1111	65	L (Elect.)	115	X (Diesel-Elec.) (See Note 4)	115
C (Diesel-Electric) (See Note 4)	80	F (Diesel-Electric)	30	R (Steam)	95	Y (Diesel-Electric)	70
D 3 (Steam)	80	H (Diesel-Electric)	70	S (Diesel-Electric) (See Note 3)	115	NA (Narrow Gauge) Steam	30
		K (Steam)	80	T (Diesel-Electric)	100		
				W (Diesel-Hydraulic)	30		

Note 1.—The maximum speeds laid down for locomotives in clause 7 hereof are subject to the maximum speeds laid down in respect of various lines, or portions of lines, and to the conditions imposed above and also on pages 54 to 57 inclusive.

Note 2.—See page 60 for speed of a locomotive or locomotives with a brakevan of fixed wheel base only attached and for speed of light locomotives.

Note 3.—The maximum speed for trains hauled by "S" class Diesel Electric Locomotives when Hostler's End leading is 50 km/h and when Hostler's End leading in Station Yards 15km/h. Set back movements, when driven from Hostler's End, are not permitted.

Note 4.—The maximum speed for trains hauled by 'X' class Diesel Electric Locomotives No's. 45 onwards and 'C' class locomotives when running long end leading must not exceed 50 km/h.

LOCOMOTIVE OR TRAIN SPEEDS AND CLASSES ALLOWED TO RUN ON VARIOUS LINES—continued.

8. Maximum Speeds for Rail Motor Train.—The maximum speeds permissible on any line for Rail Motor trains are as shown hereunder:—

Rail Motor Trains	Maximum Speed km/h
Diesel Rail Cars (Air-conditioned), 600 H.P. Nos. 40–43	115
Diesel-Electric Rail Motors	100 See footnotes

† See clauses 3 and 5, page 54

Note (a).—Although passenger trains are permitted to run over certain lines at 115 km/h the maximum speed of any passenger train hauling a Diesel Electric Rail Motor must not exceed 100 km/h. However, the 600 H.P. Diesel Rail Cars may be hauled at 115 km/h providing the bogie air springs are inflated.

(b).—The maximum speeds shown above for Rail Motor Trains, are subject to the maximum speeds laid down for passenger trains for the line or portion of line over which the Rail Motor is running, and to the conditions imposed on pages 53 to 62 inclusive. Where any goods vehicle is attached, the speed laid down on page 60 for the type of vehicle concerned must not be exceeded.

CLASSES OF LOCOMOTIVES ALLOWED TO RUN ON VARIOUS LINES

Except where otherwise provided, the following are the particulars of the classes of locomotives that are allowed to run over the various broad gauge lines. The words "and lighter" in respect of some lines or portion of lines mean locomotives of a lighter axle load than the class specified. (See instruction Working Time-table Addenda for locomotive axle loads).

1. Except where instructions to the contrary are in force the classes of locomotives allowed to run on any particular line, may also be worked on any siding connected therewith.

2. In a case of special emergency, the District Engineer may authorise the running, for one return trip, of a heavier class of locomotive (excluding "B" and heavier classes) than specified for a particular line.

3. (a) On the branch line specified hereunder, locomotives of a heavier axle load than those ordinarily authorised in pages 55 to 62 to run over such branch line, may, when necessary for shunting purposes, and subject to Block Working Rules, be placed on the branch line at the station named; in every such case the speed specified herein for the local movement on the branch line must not be exceeded. See also clause (b).

Station	Branch Line	Class of Locomotive that may be used for Shunting on Branch Lines	Speed km/h
Traralgon	Maffra.	All classes except 'C' and 'H'	15

(b) The locomotive must not proceed further than is necessary to clear the junction, and unless the return movement be governed by a fixed signal, the locomotive or train must not be allowed to foul the junction until the Engineman or Guard has been verbally instructed to do so by the Signaller.

4. Pier and Wharf Lines.—"B", "C", "H", "R", "S" or "X" Class locomotives are not permitted to run on any pier or wharf line, unless specially authorised.

LOCOMOTIVE OR TRAIN SPEEDS AND CLASSES ALLOWED TO RUN ON VARIOUS LINES—continued.

Suburban District Line or Portion of Line Between	Maximum Speed†				Classes of Locomotives Allowed to run

† See clauses 3 and 4, page 54.

NOTE B. The maximum speed between Dandenong and Moe for any goods train excepting Express Goods Trains so shown in the working Time-table, consisting of all automatically coupled vehicles (including locomotive and brakevan) will be 70 km/h. It will be the duty of the Guard of any goods train running between Dandenong and Moe to inform the Engineman at the commencing point of the train, and also at any point where the composition of the train is altered, if the train is not completely automatically coupled, and the Engineman, if relieved, must pass this information on to his relief.

SPECIAL SPEEDS

The maximum speeds laid down in clauses 1, 2, 3 and 4 hereof are subject to the maximum speeds laid down in respect of the various lines or portions of lines and to

- (i) the provision of Regulation 59;
- (ii) such **temporary speed reductions** as are shown from time to time in the "Weekly Notice" or other printed or written instructions; and
- (iii) the special speeds laid down in clauses 7 and 8, pages 53 and 54.

1. Curves. (a) Every curve, with the exception of those referred to in clause 2 hereof, that is of such a radius as to render necessary any modification of the foregoing speeds is indicated by a **curve board** (see diagram in margin) placed on the left-hand side of the line at the entrance to the curve. The number shown on the Curve Board indicates in kilometres per hour, the maximum speed allowed when going round the curve. It is pointed at one end, and is so placed that the pointed end indicates the direction of the curve, right-hand, or left-hand, as the case may be. The speed must be reduced before the locomotive or train enters on curve, and the indicated speed must not be exceeded until the whole train is clear of the curve.

2. Passing Over Points. The following speed restrictions apply generally when passing over points at stations, junctions and sidings:

	Maximum Speed	
	When Running to or from Lines Diverging from the Straight Track	When Running on the Straight Track
	km/h	km/h
(a) Except as shown in sub-clauses (b) and (c) hereof		
(i) Over facing points worked from a locking frame or otherwise securely fastened, or over trailing points	40 25	65†† 25
(ii) Over facing points held by hand		
(b) (i) Between OAKLEIGH and DANDENONG and DANDENONG and NYORA, over facing points worked from a locking frame or otherwise securely fastened, or over trailing points	40	80††
(ii) Between DANDENONG and MOE except BUNYIP, LONGWARRY and MOE, over facing points worked from a locking frame or otherwise securely fastened, or over trailing points	40 40	115†† 95††
(iii) At Bunyip (Up End)	65	95††
(Down End)	65	95††
At Longwarry	65	115††
At Moe		
(iv) Between MOE and TRARALGON except at Herne's Oak, Morwell Up End No. 2A track, Hazelwood Siding, Maryvale A.P.M. Siding and Morwell Shire Industrial Siding, over facing points worked from a locking frame or otherwise securely fastened, or over trailing points	40 40 65	100†† 95†† 95††
At Herne's Oak		95††
At Morwell Up End No. 2A Track		95††
At Hazelwood Siding		95††
At Maryvale A.P.M. Siding	65	95††
At Morwell Shire Industrial Siding	40	115††
(c) (i) Between TRARALGON and BAIRNSDALE at Hillside ONLY		

†† Where the through running track is on a curve the speed passing over points is limited by the maximum speed indicated on the curve board, provided this does not exceed the maximum permissible speed over points.

3. At Various Places.—(a) All trains.

Description	Maximum Speed
Terminal Stations— When Locomotive is passing the near end of platform at which the train has to stop. See clauses (d), Rule 11 Appendix 111., and the General Appendix.	km/h
Suburban Stations— Entering and passing through in foggy weather	25
On Single Lines— When entering a crossing station at which the train has to stop.	25
Staff Stations— When staffs are exchanged by means of Staff Automatic Exchange apparatus.	25
When exchanging miniature staff, by hand—	115
(a) When cane carrier is used	30††
(b) When automatic staff exchange carrier is used	25††
When exchanging staff (ordinary type), or delivery ticket.	25††
Rail Motor Trains when engineman is delivering or receiving a staff or ticket (see also General Appendix)	10
"S" Class Diesel Electric Locomotives—Hostler's End leading	See N. ++
Crossing Stations— When backing a train over level crossing not provided with gates	10
Examining Stations— When entering stations. See also General Appendix.	15
Permanent Way Repairer's Signals— In clear weather, when a green hand signal is waved slowly from side to side. See Regulations 98, 179, 265 and 274, also General Appendix.	25
Single Line Working— Over points which become facing points when the traffic of a double line is being worked over a single line	15
When Air Brake is Wholly Inoperative— On a long falling gradient, or when approaching any station or junction	25

†† NOTE:—When a locomotive Engineman receiving a staff from or delivering a staff to a Signaller standing on ground level, the speed of the train must not exceed 10 km/h.

When a locomotive Engineman is exchanging a Staff with a Signaller standing on ground level, the train must be brought to a stand in order that the exchange may be effected safely.

++ When a locomotive Engineman on an "S" Class Diesel locomotive running Hostler's End leading is receiving a staff from or delivering a staff to or exchanging a staff with a Signaller either on platform level or ground level the locomotive must be brought to a stand in order that the operation may be effected safely.

(b) Express Goods Train—At various locations, a Speed Board (See diagram in margin) placed on the left hand side of the line at a suitable distance before reaching a signal indicates that Express Goods Train speed must be promptly reduced to not more than the figure in the kilometres per hour shown on such board until sighting the next fixed signal. The train will then proceed according to the aspect displayed.

(c) Passenger trains—At various locations, a Speed Board (See diagram in margin) placed on the left hand side of the line at a suitable distance before reaching a signal indicates that Passenger Train Speed must be promptly reduced to not more than the figure in kilometres per hour shown on such board until sighting the next fixed signal. The train will then proceed according to the aspect displayed.

(d) Goods trains—At various locations, a Speed Board (See diagram in margin) placed on left hand side of the line at a suitable distance before reaching a signal indicates that goods train speed must be promptly reduced to not more than the figure in kilometres per hour shown on such board until sighting the next fixed signal. The train will then proceed according to the aspect displayed.

SPECIAL SPEEDS—continued

4. Various vehicles, Trains, Light Locomotives, Steam and Diesel Cranes, Diesel Fordson Rail Tractors.

Description	Maximum Speed
	km/h
Suburban 'M' (Tait) and 'CM' vehicles	80
Bogie Petroleum Tank Wagons when loaded (except those with "A" as the last letter of their classification)	80
Bogie Petroleum Wagons when empty (except those with "A" as the last letter of their classification)	95
"Z" or "ZL" Brakevans and Goods Vehicles, except Bogie Goods Vehicles with "W", "X" or "Y" as the last letter of their classification.	70
VHWA Wagons when loaded (Permission must be obtained from the Train Controller before loaded 'VHWA' wagons are conveyed by any train)	45
See item 4 (iii) on page 53.	60
"J" Wagons when loaded.	
Goods Trains by which "Dead" Locomotives are conveyed	
See page 94 Clause (b) General Appendix	
Light Locomotives—	
"S" Class Diesel Electric Locomotive No. 1 End Leading	100
"S" Class Diesel Electric Locomotive Hostler's End Leading (See note 3, page 59).	50
"B", "L" or "T" or "X" class	100
"X" Class Diesel Electric Locomotives No. 45 onwards, and "C" Class long end leading (See Note 4, page 53)	50
"H" and "Y"	70
"F" and "W" class	30
"R" or "K" class	80
"C" class (short end leading)	80
Locomotive or Locomotives with a Brakevan of Fixed wheel Base only attached. See page 53, clause 5.	70
Any Breakdown Van Train or any Train to which a Breakdown Brakevan is attached	65
Locomotives when running in any Locomotive Depot within the T.R. Point	15
Any Train by which any Diesel or Steam Crane is conveyed	The maximum speed of the Diesel or Steam Crane conveyed
Diesel Cranes—	50
Diesel Travelling Crane No. 45 (Way and Works Branch, 10 tonnes)	(See note below)

Note:—The maximum permissible speed for the Way and Works Branch No. 45 Diesel Crane (10 tonnes) will be as follows:—

Line or portion of Line	Maximum Speed	Line or portion of Line	Maximum Speed
	km/h		km/h
Dandenong and Sale	50	134.575 Km. and Yallourn	30
Sale and Stratford	50	Yallourn and Latrobe River Bridge	25
Stratford and Bairnsdale	50	Latrobe River Bridge and Brown	25
Bairnsdale and Orbost	30	Coal Mine	
Traralgon and Maffra	50	Dandenong and Yarram.	50
Maffra and Stratford Junction	30		
Moe and Yallourn :—			
Moe and 134.575 Km.	50		

On Metropolitan lines the crane may run at a maximum speed of 50 km/h or at the speed permitted for a "T" Class locomotive whichever is the lower.

SPECIAL SPEEDS—continued

4. Various Trains, Light Locomotives, and Steam and Diesel Cranes, Diesel Fordson Rail Tractors—continued.

Description	Maximum Speed
Steam Cranes—	
No. 19 (Rolling Stock Branch, Wreckage, 61 tonnes)	km/h 65
No. 10 (Rolling Stock Branch, 10 tonnes)	(See note) 25
No. 36 (Stores Branch, Grab)	(See note) 25
No. 44 (Way and Works Branch, 3 tonnes)	25

Note:—When the 61 tonnes Wreckage Crane (No. 19) is conveyed by special train, the train is permitted to run only on the lines and up to maximum speed for the Crane as set out below provided that the maximum speed of the train shall not exceed:—

- The maximum laid down for the locomotive hauling the train over the portion of the line concerned.
- The maximum speeds for Goods Trains.
- The speeds in the Special Speed Section.

When conveyed by a goods train the speed of the train shall be laid down for a goods train over the line concerned provided that it does not exceed the maximum speed for the crane as set out herein.

The maximum permissible speeds for the 61 tonne Wreckage Crane are as follows:—

Line or portion of Line between:—	Maximum Speed
Dandenong and Moe	km/h 65
Moe and Traralgon	55
Traralgon and Stratford (via Sale)	Not Allowed
Stratford and Bairnsdale	Not Allowed
Bairnsdale and Orbost	Not Allowed
Traralgon and Stratford Junction (via Maffra)	Not Allowed
Moe and Yallourn	Not Allowed
Yallourn and Latrobe River Bridge	65
(not permitted over Latrobe River Bridge)	25
Latrobe River Bridge and Brown Coal Mine	Not Allowed
Dandenong and Yarram.	Not Allowed

Description	Maximum Speed
On Truck Weighbridge—	
(i) Vehicles over Scales	km/h 15
(ii) Locomotives or Vehicles over Weighbridge relief rails	15
Pushing Trains—	
On Running Lines	15
When passing around any curve of less than 161 m radius	10
Empty trains, when Guard, Shunter, or other employee leaves the leading vehicles to attend to the points	3

SPECIAL SPEEDS—continued.

4. Various Trains, Light Locomotives, Steam, Diesel Cranes and Diesel Fordson Rail Tractors—continued.

DIESEL FORDSON RAIL TRACTOR

Description	Maximum Load Hauling or Propelling	Maximum Speed
Diesel Fordson Rail Tractor—	Tonnes	km/h
On Level Track.	230	30
On grades 1 in 50	30	
1 in 75	65	10
1 in 100	85	
1 in 110	90	
1 in 200	150	

TRAINS ON RUNNING LINES WITHOUT A BRAKEVAN IN THE REAR

Subject to the conditions laid down in Regulation 232 and the instructions pages 136 and 137, General Appendix, the following trains or classes of trains may run without a brakevan in the rear on the sections of lines specified, viz.:-

Train or Class of Train	Section	Maximum Number of Vehicles
*Goods Train	Between Flinders Street and Spencer Street	10
	†Between Spencer Street and Newmarket	40
	†Between Flinders Street and Port Melbourne	60
	Between Graham and Princes Pier	35
	Between Melbourne Yard and Maribyrnong River Goods Siding	40
	Between Newport and Williamstown, Newport South and Newport Workshops	30
	†Between Melbourne Yard and Newport (Via Passenger Lines)	40
	†From Caulfield to Glenhuntly	20
	†Between Dandenong and Lyndhurst	10
	†Between Dandenong and General Motors	30
	Between Moe and Yallourn	60
	†Between Morwell and Hazelwood	20
	†Between Morwell and Maryvale Siding	20
	†From Traralgon Cattle Yards (Sale Line) to Traralgon	15
	Between Sale and Sale Industrial Estate Private Siding	15
	From Woollen Mills Siding (Stratford Line) to Sale	10
	From S.E.C. Siding to Bairnsdale	10
	From Korumburra to Korumburra Cattle Siding	10
	†Between Toora and Barry Beach	20
	Between Melbourne Yard and Westall	2

*Except where otherwise provided, the practice must be limited to the hours between sunrise and sunset.

†Also during the hours of darkness.

LOCOMOTIVES RUNNING TENDER FIRST

1. Unless specially authorised, no locomotive employed as assisting locomotive on a passenger train shall run tender first.
2. Subject to paragraph 1, a locomotive may run tender first on any line at any time.

LOCOMOTIVES ASSISTING IN FRONT OF TRAINS

(Regulation 174)

1. (a) Subject to the following instructions, an assisting locomotive may be employed in front on a passenger mixed or goods train over the lines or sections of lines shown in clause 5 hereunder.
(b) The train locomotive and the assisting locomotive must be of a class allowed to run on the portion of the line over which the assisting locomotive is to be employed.
(c) in the case of—
 - (i) Passenger Trains—The load must not exceed the maximum authorised load for the train concerned. In no case must either locomotive be run tender first.
 - (ii) Goods Trains.—The authorised load, vehicular or tonnage, must not be exceeded.
2. If the train will use the Automatic Staff Exchanger and only one locomotive be so equipped this locomotive shall be the leading locomotive.
3. When a train is hauled by a steam locomotive and a Diesel Electric or Diesel Hydraulic locomotive, the steam locomotive must trail.
4. When an assisting steam locomotive is employed, a water tank may be attached between the locomotives.
5. The lines and sections of lines on which double heading of trains is permitted are as shown hereunder:—

Section—

Melbourne and Bairnsdale, via Rosedale or Maffra. Dandenong and Yarram.
Bairnsdale and Orbost.
Moe and Yallourn.

6. Where a higher powered diesel locomotive than "T" or "Y" class is running in multiple with either "T" or "Y" class locomotive, the higher powered locomotive with a dynamic brake and staff exchanging apparatus, must be the leading locomotive, except where instructions have been issued to the contrary.

LOCOMOTIVES ASSISTING IN REAR OF TRAINS

(Regulation 173).

1. Locomotives are only to assist in rear of trains over such sections of the line as are shown in the following list, or in cases of emergency, in accordance with the Rules and Regulations.
2. During foggy weather, a passenger or mixed train must not be assisted by a locomotive in the rear; the assisting locomotive must be attached in front subject to the provisions laid down in the instruction under the heading of Locomotives Assisting in Front of Trains.
3. The bank locomotive must be coupled to the rear of the train whilst the train is stationary, and the automatic brake must be connected throughout the whole of the train. When the necessary brake tests have been completed and the enginemen have exchanged the proper hand signals the train may proceed.
- 4 (a) When a bank locomotive runs through the section, it must not be uncoupled until the train is within the protection of the home signal at the station to which it is appointed to run.
(b) At certain places, the train is only assisted to a Stop Board, or other specified location in the section. In these circumstances the train must be stopped with the train locomotive near to the Stop Board or other specified location. The bank locomotive must be immediately uncoupled from the train which may then proceed. The bank locomotive must return without delay, to the home signal at the station in the rear.
5. Locomotives assisting on goods trains must not be allowed to remain attached to trains after load has been so reduced that assisting locomotive is no longer required. Locomotives must be returned as soon as possible and from nearest suitable station, in every case, unless required for loading on the return journey.
In all cases when an assisting locomotive to be returned light is held for more than fifteen minutes, a full report, giving particulars of the detention, must be forwarded to the Chief Train Controller.
6. The employment of a locomotive to assist in the rear of a goods train where authorised by the abovementioned instructions is permissible whether the train concerned is hauled by one or two locomotives in front provided that the relevant instructions contained in Working Time-table books relating to locomotives assisting in front of trains (Regulation 174), and locomotives assisting in rear of trains (Regulation 173) are fully observed.

List of Sections over which trains may be assisted in the rear:—

Section	Class of Train and Special Instructions to be observed
Traralgon to "Stop Board" at 158.923 km. (Sale Line).	Goods Trains.
Traralgon to "Stop Board" at 159.216 km. (Maffra Line).	Goods Trains.
Bairnsdale to "Stop Board" at 273.186 km.	Goods Trains.

PUSHING TRAINS ON RUNNING LINES

Subject to the conditions laid down in Regulation 201 and supplementary instructions contained on page 109 of the General Appendix permission is given for trains to be pushed on Running Lines at the following places:

PLACES	ADDITIONAL ORDERS
Barry Beach Junction and Barry Beach	Number of vehicles not to exceed (6)
Dandenong and Shell Co's Siding	
Traralgon to Traralgon Cattle Yards (Sale Line)	Number of vehicles not to exceed (15)
Sale to Woollen Mills Siding (Stratford Line)	Number of vehicles not to exceed (10)
Bairnsdale and Shell Co's Siding	Number of vehicles not to exceed (4)
Bairnsdale to S.E.C.	Number of vehicles not to exceed (10)
Waygara Sawmilling Co. Siding to Nowa Nowa	Number of vehicles not to exceed (8)
Cattle Siding to Korumburra	

TRAILING OF VEHICLES BEHIND PASSENGER AND GOODS TRAINS

GENERAL NOTES.

A copy of every new issue of the WORKING TIME-TABLE BOOK, or section of the Book, is to be supplied to all concerned in accordance with Regulation 8.

It is imperative that each Stationmaster carefully check this Time-table, regarding the timing of trains, crossing arrangements, etc., so far as his own station or the stations he supervises are concerned. He will be held responsible for promptly bringing under the notice of the Time-tables Co-ordinator (Room G.38) and Manager, Suburban Stations or Manager, Country Train Operations (Eastern) any inaccuracies that may appear herein. WALL SHEET TIME-TABLES issued in conjunction with this book are to be posted in a prominent position at a height from the ground and in close proximity to a light to enable passengers to consult it with facility. A red line must be ruled on each time-table under the name of the station concerned and time applying to it.

PASSENGER TRAIN AND RAIL MOTOR RUNNING.—Depot stations must obtain full particulars from Guards of the late running of Passenger Trains and Rail Motors. In the case of a Rail Motor run without a Guard, the necessary particulars shall be obtained from the Engineman. In the event of any time being lost by the locomotive, the cause, also locomotive number and class, must be ascertained from the Engineman and the Train Controller advised. Enginemen will require to explain the cause of any time lost that in the aggregate exceeds the time gained on the journey.

When a Passenger Train or Rail Motor is blocked at a roadside station, the Train Controller must be advised by the Stationmaster at the station at which the block occurred and if the train which caused the block was running late, the cause of such late running (whether overtime in section or other cause) must be given if ascertainable.

SUBURBAN PASSENGERS NOT TO TRAVEL BY INTERCITY AND INTERURBAN TRAINS.

Country trains to and from Melbourne including Rail Motors as well as Locomotive hauled Passenger Trains shown in the Working Time-table books are not available for inter-station passenger travel within the electrified suburban area unless otherwise specified in the Time-table books.

One class suburban ticket holders are not permitted to travel in first class carriages.

SCHEDULED STOPPING ARRANGEMENTS FOR COUNTRY PASSENGER SERVICES.—The instructions regarding action to be taken by train men concerning "if required" stops when necessary for passenger purposes are shown on page 4.

NUMBERING OF COUNTRY TRAINS.—With the introduction of Train Descriptor Numbers in the Metropolitan District Working Time-table, all Country Passenger and Goods trains that pass through the Metropolitan Area are allocated numbers for the various Country Districts as shown hereunder:—

TRAINS

	PASSENGER	GOODS
Northern and Midland.	8000 - 8099	9000 - 9099
North Western.	8100 - 8199	9100 - 9199
South Western.	8200 - 8299	9200 - 9299
North Eastern.	8300 - 8399	9300 - 9399
Eastern.	8400 - 8499	9400 - 9499
Standard Gauge.	8600 - 8699	9400 - 9499

The Werribee-Newport shuttle service will carry Metropolitan numbers, viz 6451 onwards for "Down" trains and 6450 onwards for "Up" trains.

24 HOUR TIMINGS

24 hour timings are used throughout this Time-table and associate Train Running Documents.

The hours are numbered consecutively from 01 to 23 then 00 (as shown on the dial). Instead of a.m. and p.m., 12 is added to the hours after midday, thus 1.00 p.m. becomes 13 00, 5.00 p.m. becomes 17 00, 9.00 p.m. becomes 21 00 (or 21 19 or 21 47 according to the minutes after the hour) and so on. Midnight is 00 00 and times between midnight and 1.00 a.m. are shown by the figures 00 01 to 00 59.

Note—All quotations of train times to the travelling public should still be in 12 hour a.m. and p.m. times. Wall-sheet and Public Time-tables will continue to be shown in 12 hour a.m. and p.m. times.

TRAIN TIME-TABLE REFERENCE SYMBOLS

Express, Passenger, Rail Motor and Mixed trains must stop at stations where so scheduled in the time-tables. Where the times of arrival and departure of trains are not both stated, the times shown are of those of departure from stations.

Where the time for the train is shown without the addition of one of the undermentioned symbols or other special reference, a definite stop must be made.

Where the following standard symbols viz., *, ∇, d, u, ††, π, # and ● are utilized with or without, as the case may be, a time being shown, they indicate how the train shall be dealt with at the particular station or stations, e.g., whether non-stop, or to stop in certain circumstances.

The symbols referred to and their application to the timetable are as follows:-

* Trains will not stop to pick up or set down passengers at stations where the train schedule is marked thus, or where this symbol occurs without an accompanying time.

∇ Indicates that the train shall only require to stop at the station or Rail Motor Stopping Place concerned in the following circumstances:

- (1) When signalled from the station to stop, indicating that there are passengers, vangoods and/or mails to be entrained.
- (2) And/or when the train is conveying passengers, vangoods or mails for the station. The Guard is responsible for informing the Engineman that there are passengers, vangoods, or mails to be discharged. If no conductor on train, the Guard must make the necessary inquiries among the passengers at the previous stopping station. If no Guard be employed on a Rail Motor, the Engineman must make the necessary inquiries.

d Trains to stop to set down, if required, but not to pick up passengers at stations where the train timetable is marked thus. Passengers desiring to alight must give notice to the Conductor at the previous stopping station, where Conductors must also inquire. On trains which have no Conductors, the Guard will be responsible for this duty. If no Guard be employed on a Rail Motor, the Engineman must make the necessary inquiries. The Guard is responsible for informing the Engineman that there are passengers to be detrained.

u Picks up only.

†† Trains marked thus run only if required. Special advice will be issued by the Chief Operations Manager, Chief Train Controller, District Senior Train Controller or Depot Stations when the running of such trains is necessary.

● Indicates that the train must when practicable be despatched from the station concerned at the earlier time shown.

π Train stops to set down only, if required, but not to pick up passengers.

Not advertised

◆ Indicates that the Road Coach shall only stop when signalled to do so by an intending passenger and/or when conveying passengers for that stop.

▲ Reservations are compulsory by this train. Bookings must be made through the Central Reservation Bureau or Regional Booking Centres.

STATION REFERENCE SYMBOLS

E.S. Electric Staff Stations.

† Staff Stations, at which the staff, a Staff Ticket, or a Line Clear Report must be received before starting, and delivered on arrival.

NC No one in charge stations.

○ Stations Worked under Rail Agent conditions, but at which the employees in charge are authorised to collect freight charge.
