Instructions for fixing pawl & pawl stops to turntables

1. Stake A end of turntable to the floor so the wheels bear on one end of track rail at the turntable rail and B in proper alignment with track rail at adjustment D.

2. Securely fix the pawl stop(D) and adjust at D in line with the turntable as indicated on the drawing.

3. Turn the loaded B of the turntable round to adjustment D, cut the turntable rails at the proper alignment and then on line with A in this position fix the pawl stop(D) and fix pawl to pawl stop(D).
